WILLOW INDIGENOUS COMMUNITY SERVICES LTD.

LAND FOR GENERATIONS

WILLOW

Know what your land holds. Decide what happens next.

Your land. Your rights. Your decision.

IN PLAIN WORDS

What you get

- We find out what your land holds, in whatever form it takes.
- We find out who holds mining claims, leases and permits on it today.
- It all goes in one confidential file that the Nation owns: maps, records and professional reports.
- What the Nation does with it is its choice: protect an area, say no to a project, or build a business.
- When the Crown must consult, or a company asks to talk, the Nation starts from its own facts.

HOW IT WORKS

Four steps. A decision after each one.

- **1. The Screen.** A registered geoscientist's first look at the government and industry records for the area leadership chooses. About three weeks.
- **2. The Base Study.** The full file: maps of what is there and who holds what, with the geoscientist's signed report.
- **3. A resource report.** A signed opinion on the one resource leadership chooses, with the next step and its cost.
- **4. Protecting or claiming ground.** Ways to protect an area, or claim it in the Nation's name, with the yearly cost of each.

Every step has a fixed price, set out in writing before anything starts.

PAYING FOR IT

Help with the funding

- Federal and provincial programs can help pay for this work. We point to the ones that fit.
- The Nation is the applicant. We help your staff prepare, and leadership signs.
- Our fee is a fixed price. We take no percentage of any grant and no success fee.

FOR YOUR PEOPLE

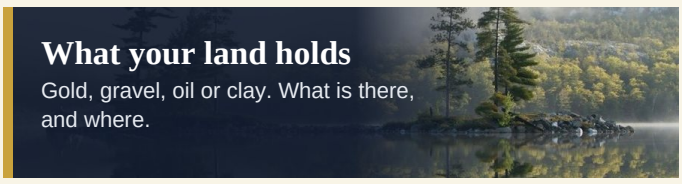

Jobs, training and business at home

- A paid role on the project for one of the Nation's lands staff, and a community liaison chosen by leadership.
- Every firm we bring in commits in writing to hire and train members.
- The file shows where the business opportunities are.

OUR RULES

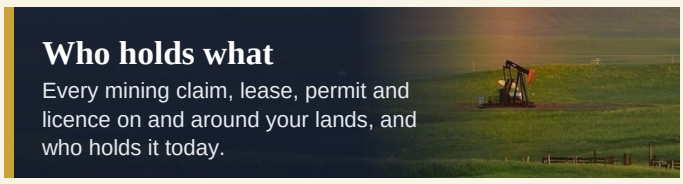

The file is yours. So is every decision.

- The file is confidential to the Nation. The Nation owns it and decides who sees it.
- Sacred places are recorded only if the Nation chooses.
- We take no share in the land or anything found on it.
- We never take money from a company sitting across the table from you.
- Nothing in this work gives up or limits any treaty or inherent right.
- Registered professionals sign the technical work. We work alongside the Nation's own staff and lawyers.

What your land holds

Gold, gravel, oil or clay. What is there, and where.

Who holds what

Every mining claim, lease, permit and licence on and around your lands, and who holds it today.

Book a conversation. No cost, no commitment.
